Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The feature of using a laser to induce an optical dipole trap in a target carbon nanotubes to move the target carbon nanotube from a first to a second microfluidic layer renders the invention novel and non-obvious over the prior art. Here, the prior art teaches the use of laser induced optical traps to separate cellular particles (See e.g., Oakey et al., US 2003/0159999, para. 50-56). The prior art, however, does not teach the application of an optical trap to carbon nanotubes, wherein a frequency less than a resonant frequency is required to move the target nanotubes. The only reference that suggests this application (Plewa et al.) does not have a proper date.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
